Experience

AweAuth

Front-End Developer - Toronto   08/2023 - 01/2024

Collaborated on the development of a permissions service application, contributing to the front-end using Vue JS and HTML&CSS. Successfully interfaced with the backend, developed by a partner, to ensure seamless communication and functionality.

- Vue JS
- HTML&CSS

KeepInMind

Full Stack   04/2023 - 12/2023

Designed and implemented a text-centric social platform, leveraging a robust tech stack including AWS services such as Cognito for authorization, DynamoDB for article data storage, and S3 for content management. Developed the entire frontend using Vue JS, ensuring a responsive user interface, and incorporated HTML and CSS for a polished presentation.

- Full Stack
- AWS
- VUE JS
- HTML&CSS

Automag

Front End Developer - Kazan   07/2021 - 05/2023

This company hired me for making html&css pages, also was working there as a cashier before.

- HTML&CSS
- Customer service

GTA V server development

Front End Developer - Toronto, ON   03/2020 - 01/2021

Had the first experience with Vue JS and GTA V RageMP.

It was pretty helpful experience that introduced me into the basics of Vue JS and Server side development.

- Vue JS
- Basics of server side development

Skills

Vue JS, HTML 5, CSS, JavaScript, Python, Customer service, English, Russian

Education

High School Diploma

Braemar College Toronto, ON   11/2022

Was volounteering and grateful student

In childhood

Had an experience working with Arduino and Raspberry PI. Also, had a tutor that taught me a lot of helpful information about programming languages and introduced me to the html&css, basics of Arduino and Game Development.

Projects for competition among school educations

Engeneering Lyceum in Kazan   06/2016

Developed several projects as parser for steam on python that compared prices and returned profitable options. Also, some arduino projects such as robot that moves along the black lines.
